

Welcome to Madrid

This cinema in the Chamberí neighbourhood was opened in 1943 and since then it has offered a selection of the best experimental and independent films. Pioneers in the sound system, it has implemented the latest technology, such as TODD-AO system and THX, as well as digitalization. As of September 2021, it has embarked on a new phase under the mK2 French exhibition chain, which has 125 screens all over Spain.

The Paz Cinema also hires out its five film theatres and the hall to host diverse types of events.
