

# Welcome to Madrid

The first thing that strikes you about this megacentre in **San Sebastián de los Reyes** is its elegant appearance and carefully designed exterior. The interior is equally impressive: the shopping area extends over 50,000 square metres and contains columns, balustrades and marble staircases, all covered by a glass dome. Another notable feature is the amount of natural daylight entering through the windows, an unusual feature in this type of establishment. Home to 225 shops selling all types of goods, the centre provides a very attractive shopping environment.

## Complementary services
