

Welcome to Madrid

Located in Torrejón de Ardoz, a municipality to the east of the Community of Madrid, this is the largest open-air commercial, leisure and gastronomy centre in Spain. The main attractions of this new macro space, spanning over more than 250,000m², are 4,000 parking spaces, 117 establishments, leisure for all ages, green areas, a gastronomic market, a large central lake and even a beach.

The French group, La Compañía de Phalsbourg, is behind Oasis Madrid, a real oasis for those who visit it thanks to the spacious green areas with more than 100,000 trees and shrubs and 90,000m² to stroll around, shop and relax. It also has a co-working space.

Its extensive leisure and entertainment proposal consists of go-karts, zip lines, climbing, cinemas, virtual reality, an open-air stage for performances, shows and concerts, and a varied cultural programme with exhibitions, opera, zarzuela and much more.

The construction of this commercial centre has been designed to cause minimum impact on the environment. Therefore, photocatalytic materials have been used to make better use of energy and heat from the sun; more than 7,500m² of solar panels have been installed on the rooftops of different buildings to consume energy in a more sustainable way; it has more than 5,000m² of green tiles; and water is reused and purified to keep the central lake in perfect condition without increasing water consumption. All of this has contributed to Oasis Madrid obtaining two of the most important sustainability certificates, such as BREEAM, with an excellent classification.
